

Superior Equipment, Superior Results

THERE ARE NO SHORTCUTS TO ANY PLACE WORTH GOING. *HELLEN KELLER*

In the print business, we often hear about companies who have shifted focus. One day they are printing brochures and the next; pocket folders and folding cartons. Those companies would have you believe simply wanting to shift their product portfolio gives them credibility to do so. In Wyoming they have a famous saying we find appropriate in this case, "You can put lipstick on a pig, but it's still a pig".

At North Star Printing we partner on folding carton projects with some of the most innovative companies in business today. This focus requires us to invest in new equipment and technology to get the job done right. An example of this commitment is our Heidelberg Speedmaster CD 74, a five color press with an inline coating station optimized for your folding carton needs. Integration with our workflow software, high registration accuracy and high speed performance make this press the ideal solution for all your folding carton needs; no matter how large or small.

In the print industry there are those who are serious about partnering with you on your folding carton projects, and everyone else. Why not take a tour of our facility and experience the North Star Printing difference?

Don't you owe it to yourself to talk to an expert for all your folding carton needs?

For more information, please call and speak to one of our Sales Representatives.
