

Focus on Productivity

IF YOU WANT TO PREDICT THE OUTCOME, CONTROL THE PROCESS. IN-HOUSE CONVERSION AND FINISHING IS A KEY ELEMENT OF OUR ON TIME SUCCESS.

In the fast moving world of folding carton fabrication, many printers sell themselves as “folding carton experts”. After all, they have the fastest press in town which will run 18 point C1S. But what about embossing/debossing, scoring, folding, gluing and all other finishing processes?

At North Star Printing we understand our ability to meet your deadlines is critical to your success. For this reason we continue to invest in the latest equipment including our new Brause 1100 C4/C6 folding carton gluer. This incredible machine has operating speeds of over 100,000 cartons per hour accommodating all the most common (and not so common) folding carton projects including: straightline, lockbottom, auto bottom, four and six corner collapsible carton, nutraceutical boxes, CD/DVD boxes and pocket folders just to name a few.

Your innovative products require a fresh approach to packaging and, equally important, the expertise to translate outstanding ideas into a highly efficient packaging line. At North Star Printing, we have been providing fast, affordable and high quality solutions for nearly two decades.

Shouldn't you be talking to North Star Printing for all your folding carton needs?
