

Focus on Sustainability

“WE NEED TO DEFEND THE INTERESTS OF THOSE WHOM WE HAVE NEVER MET AND NEVER WILL”. JEFFREY D. SACHS

Many people think harvesting trees is harmful and irresponsible. In reality, with proper forestry practices, trees and lumber are a renewable resource. FSC® certification ensures that products come from well managed forests that provide environmental, social and economic benefits.

At North Star Printing we understand that how we conduct business can affect the environment and we want to minimize that impact. FSC® Certification is another responsible option we can offer our customers. For that reason, we spend literally hundreds of hours per year ensuring our people, our equipment and our processes are in harmony with this international standard.

How will you know your print partner is FSC® Certified? A chain of custody certification is available to verify practices are in place to ensure the sustainability of the harvested forest. At each stage in the chain of processing and transformation, chain of customer certification is needed to confirm that FSC® certified wood products are kept separate from other products, or mixed in approved ways.

If you are looking to work with a printer partner who cares for the environment as much as you, we are applying for that job.

For more information, please call and speak to one of our Sales Representatives.
